Git & GitHub - Session 1

Assignment Report

Student: Zeynab Khatib **Student ID:** 146586

Date: 12 October 2026

1. Project description

I used the provided starter website and organized it as a small Git project. The webpage contains a project overview, a status section, a banner, and a JavaScript message.

2. Files used

The main files are index.html (webpage), style.css (design), app.js (status update), assets/project-banner.svg (image), README.md (instructions), and .gitignore (ignore rules).

3. Git work completed

I initialized a local Git repository on the main branch, added the project files, and made an initial commit. I created the feature/status-message branch, changed the message in app.js, committed the change, and merged the branch into main.

4. .gitignore rules

The local.env file and normal .log files are ignored. The important.log file is kept trackable through the !important.log exception. Files in tmp/ are also ignored.

5. How to run the website

Open index.html in a browser. The page displays the banner, project information, and a status message updated by JavaScript.

6. Results and conclusion

The local Git commands completed successfully. The repository has the main branch and a separate feature branch, with an actual merge commit. This practice helped me understand basic Git commands, commits, branches, merges, and ignored files.

7. Local Git evidence

Current branch

```
main
```

Commits before report

```
28da282 Merge feature/status-message into main
080e6a5 Initialize Session 1 project and Git ignore rules
07d4c42 Update website status message on feature branch
```

Tracked required log

```
important.log
```

Ignored local.env

```
local.env
```

Ignored app.log

```
app.log
```

Working tree status before report

```
(clean)
```

8. Remote GitHub work

A remote GitHub repository has not been created or connected during preparation of this package. Therefore, no remote push, fetch, pull, or GitHub URL is claimed as completed. These actions require access to the student's GitHub account.
